

PRIMARY MEMORY

- **Primary memory is a volatile memory**
- **Primary memory is faster**
- **The computer can't run without a primary memory it is a built in memory of computer**
- **Example:RAM,ROM**

SECONDARY MEMORY

- **It is a non-volatile memory**
- **Secondary memory is slower**
- **Computer can run without the secondary memory it is just a helping extended storage**
- **EXAMPLE :**
HARDDISK,CD,DVD,PENDRIVE,ETC
